THE WORLD at the millennium is a place of extraordinary contrasts.

Marx and the 1848 revolutions. Sunday 3:45pm

It is a world of fantastically powerful and inventive technologies. Yet it is a world where over 10,000 children die each week from preventable diseases.

We live on a planet where whole swathes of humanity live in poverty yet one man, Bill Gates, owns sufficient wealth to feed, clothe, house and provide education and clean water to everyone.

Zapata and the Mexican Revolution Sat.11:45

In other words it is a world created by an ageing capitalist system.

With large parts of the world economy in recession and with the US dependent on a financial "bubble" economy the new century holds out the prospect of being like the last. That is, struck by economic shocks, political instability, war and revolution.

1989 and the fall of Communism Sat. 10am

A hundred and fifty years ago Karl Marx predicted many of the features of the world today. Marx also argued that the working class would be a growing force for revolution.

Class and poverty in Northern Ireland. Sunday 3:45pm

Marxism at the Millennium is a celebration of Karl Marx's revolutionary ideas and a serious examination of the issues facing socialists today.
